

Facility Manager

Adalis is offering an opportunity for a motivated and dynamic professional to lead our Manufacturing team. Adalis is a global packaging and supply chain solutions provider differentiated by innovation, expertise and optimization capabilities. Position will be located in Vancouver, WA

Summary: Oversee the global management of all areas of Adalis Manufacturing to produce products and direct activities so that products are manufactured on-schedule, within quality standards and cost objectives.

Duties:

- Assist Operations Manager in the development, formulation and implementation of long and short-range strategies and goals.
- Maintain and execute manufacturing plan that aligns with the business strategic objectives.
- Formulate and recommend manufacturing policies and programs that will guide the organization in maintaining and improving its competitive position and the profitability of the operation.
- Plan and achieve optimum employee levels with least amount of overhead and raw material costs to meet budgetary plan.
- Ensure the effective management of the production, purchasing, & distribution of manufactured product.
- Maintain and execute the global operations budget.
- Direct and monitor managers to accomplish the goals of the manufacturing plan, consistent with established manufacturing, quality and safety procedures.
- Work with all the LSS activity in the facility to help keep projects flowing by coordinating maintenance and engineering support, and ensuring process coverage so projects and Kaizens can occur.
- Plan, initiate and coordinate the capital expenditure program for improving productivity.
- Promote safety awareness and monitor compliance with government and company safety regulations.
- Create, lead, develop, and manage a manufacturing team capable of carrying out the necessary manufacturing strategies.
- Advise managers on labor issues including safety, security, employee relations, scheduling, training, etc.
- Ensure managers and supervisors are adhering to company policy and administering practices in a fair and equitable manner

Qualifications:

- Bachelor's Degree in Engineering (Mechanical or Electrical). MBA preferred.
- 5-7 years manufacturing management experience with a minimum 3 years direct supervisory experience.
- Excellent team building skills with proven ability to positively impact workplace culture.
- Well developed short/long-term manufacturing planning skills, and solid business, financial & analytical abilities.
- Strong computer skills (word processing, spreadsheets, internet software, databases, AS400 systems, presentation software, email).
- Strong written and verbal communications and interpersonal skills with ability to work with and influence others from different functional areas.
- Proven ability to lead, motivate and win the respect of exempt and non-exempt employees.
- Ability to organize workload, manage projects, determine priorities and modify plans in a dynamic environment.
- Possesses or develops an understanding and appreciation of Adalis, its markets and customers globally
