

Adalis Expands Packaging Development Capability

Company opens new packaging prototype center for retail, industrial, and medical markets

MINNEAPOLIS, MN. – Oct. 24, 2006 – Adalis Corporation, a global packaging and supply chain solutions company, today announced that the company has expanded its packaging development offerings with the opening of a new Packaging Development Center. The new facility, located in Minneapolis, MN, complements Adalis' packaging development capabilities to now include prototype development, packaging sample production, and thermoforming.

"The launch of the center and the expansion of services are in direct response to our clients' growing needs in seeking quality sample prototypes to help improve product protection and develop innovative packaging designs," said Tom Blanck, manager of packaging solutions for Adalis. "We are very excited to offer this new capability and become the one-stop resource to help companies respond to time-critical needs and efficiently bridge the gap from design concept to package development."

Prototype design and creation provide benefits to companies that require quality packaging for use in new product launches and distribution testing as well as domestic package design for offshore manufacturing situations. Clients will be able to obtain sample packaging prototypes using many substrates, such as corrugated, paperboard, plastic, film, foam, and other materials. The new center also features thermoforming capabilities to produce clamshells, blisters, and skin packaging. Adalis also deploys state-of-the-art software and design applications including SolidWorks, Artios, and other packaging optimization tools to further streamline and increase productivity.

Adalis' Certified Packaging Professionals possess a wide range of industry experience combined with many years of practice in various packaging disciplines. The company provides expertise on packaging design and development, cost reduction, and damage reduction to Fortune 500 companies in the medical, technology, consumer goods, industrial manufacturing, and retail industries worldwide.

About Adalis

Adalis Corporation is a global consulting firm with three distinct practice areas serving the consumer packaging, corrugated manufacturing and wood panel industries. Utilizing extensive expertise, innovation and technology, Adalis provides clients with services and solutions that help improve the bottom line and create competitive advantage.
